

JULIA LOUISE M. CONTRERAS

Iloilo, Western Visayas | 09184137410 | contrerasjulialouise@gmail.com

Github: <https://github.com/juliaconts>

A computer science student at the University of the Philippines Visayas with hands-on experience in full-stack web and mobile application development using React, Node.js, Flask, PHP, and Flutter. Experienced in designing and implementing database-driven systems using MySQL, PostgreSQL, SQLite, MongoDB, and Firebase, with exposure to CRUD operations, backend integration, and application testing. Skilled in UI/UX design and prototyping using Figma and Canva, translating wireframes into functional and responsive applications. A detail-oriented and collaborative developer with strong problem-solving abilities, eager to contribute to software development, system testing, and UI/UX enhancement in fast-paced, team-based environments.

TECHNICAL SKILLS

Programming Languages: Python, C, Java, Kotlin, Flutter, PHP, SQL, Assembly, Typescript, JavaScript, Dart

Framework & Web Technologies: Flask, HTML, CSS, Firebase, Flutter, React, Node.js, Laravel

Database: MySQL, SQLite, Firestore, PostgreSQL, MongoDB

Software Development: Familiar with Software Development Life Cycle (SDLC) & basic software testing practices

Tools: Git, GitHub, GitHub Desktop, VSCode, Ubuntu, WSL, XAMPP, Jamovi, Canva, Figma, Balsamiq, Trello

PROJECTS

FishLERS (Fisheries Laboratory Reservation System)

Deployed Link: <https://fishlers.vercel.app/>

Framework: *M/FERN Stack (Firebase, Mongodb, Express.js, React, Node.js, TypeScript, DaisyUI)*

- Developed the Request Page interface using React and DaisyUI, enabling students to submit laboratory reservation requests through a responsive web system.
- Served as Project Manager, overseeing development progress, coordinating tasks, and debugging system issues to ensure smooth delivery and authored Software Requirements Specifications (SRS) and technical documentation to define system features, workflows, and support development and testing processes.
- Designed UI/UX wireframes and prototype, and implemented backend integration using Firebase, with a MongoDB backup database for data redundancy and reliability.

UPV Org Hub

Github Repository: https://github.com/CMSC129-LABS/CMSC129-Lab3-ContrerasJL_LansoySLD.git

Framework: *Laravel-MVC Framework (Blade, PostgreSQL, PHP, Composer)*

- Designed and implemented the backend system using Laravel MVC, including database schema setup and configuration.
- Developed and optimized core database operations, including seeding and structured data initialization.
- Implemented full CRUD functionality to support dynamic and efficient management of organizational data and integrated a chatbot system powered by Gemini AI, capable of performing CRUD operations to enable automated user interaction and efficient data management.

ToDoDoo

Deployed Link: <https://julialouise.pythonanywhere.com/login>

Tools: *Python, Flask, SQLite, HTML/CSS/JS*

- Designed and developed the web application interface and layout using HTML, CSS, and JavaScript.
- Built and integrated the backend system using Flask and SQLite, including database management and application logic.
- Implemented core features including full CRUD task management and basic security practices such as user authentication and data validation.

Komsai Uncensored Batch Website

Github Repository: <https://github.com/senqui-UP/126-final-project.git>

Tools: *HTML/CSS/JS, PHP, MySQL, XAMPP*

- Developed user authentication system, including registration, and login functionality.
- Built the Freedom Wall feature enabling anonymous post submission and viewing using PHP and MySQL.
- Implemented CRUD operations for managing posts and developed a user profile page for managing user-generated content.

Picstoria

Github Repository: <https://github.com/juliaconts/picstoria.git>

Tools: *Flutter, Firebase, Dart*

- Developed a full-stack mobile application using Flutter and Firebase, implementing both frontend UI and backend services.
- Built core CRUD functionality for a daily photo diary, enabling users to create, view, update, and delete entries.
- Implemented secure user authentication to manage accounts and protect user-generated content.

Komsai.Org Student Database

Github Repository: <https://github.com/juliaconts/cmsc127-finalproject.git>

Tools: *PHP, MySQL, CSS*

- Designed the user interface and data display pages for the student database system.
- Implemented data fetching and dynamic rendering of records from the database.
- Integrated PHP with MySQL to enable database connectivity and data retrieval.

EDUCATION

University of the Philippines Visayas

BS in Computer Science, Undergraduate
Running GWA: **1.916**

AFFILIATED ORGANIZATIONS

UPV Komsai.Org
UPV Elektrons
UPV Badminton Club

Vice President for External Affairs (2025-2026)
Vice Governor for Internal Affairs (2025-2026)
President (2024-2025)
